25X1X

1. An air force barracks installation was on the south-southwestern perimeter of Stanislaw (48°56'N/24°38'E), Ukrainian S.S.R., about 5 km west of the railroad line to Chernovitsy, about 2.5 km southeast of the Bystrzyca Zolotvinska River, some hundred meters north or north-west of the military airfield, on the east side of the road leading from Stanislaw to the airfield. Formerly, the barracks installation was allegedly occupied by a Polish Air Force unit and later by a German Air Force unit. War damages were repaired in 1945 and 1946. During the period of observation, the installation was occupied by air force personnel of the Stanislaw military airfield. The commanding officer, a colonel, a hero of the U.S.S.R. twice, and all the other officers, who were captains and majors, wore decorations. Most of the personnel were 18-to 19-year-old officer candidates who were given pilot training. In addition to the flying personnel, about 200 ground personnel were quartered in the barracks installation of the field.
2. The layout of the buildings was as follows:
 - a. Headquarters building, 25 x 60 meters, four-story brick structure housing the commanding officer and headquarters offices. The officers building, 20 x 100 meters, three-story brick structure, housed the officers mess on the ground floor and officers billets on the other floors. Both buildings were located along the road. These buildings were separated from the rest of the installation by a wall.
 - b. Four-story military prison, 20 x 30 meters
 - c. Guardhouse, 10 x 25 meters
 - d. Two five-story brick buildings, each 20 x 150 meters, located parallel to each other. One building quartered officers, pilot candidates and training personnel and the other the 200 ground personnel.
 - e. Mess building, 50 x 150 meters, three-story brick structure,

for food storage and PA goods. The southern section was used for weapons, equipment, clothing, and small arms ammunition storage.

The barracks area was surrounded by a wall. A sentry furnished by the ground personnel was posted at the entrance to the headquarters building.

25X1 3. [] not observe the number of aircraft at the field. Flying was practiced by biplanes which, occasionally, towed sleeve targets at which other biplanes fired.*

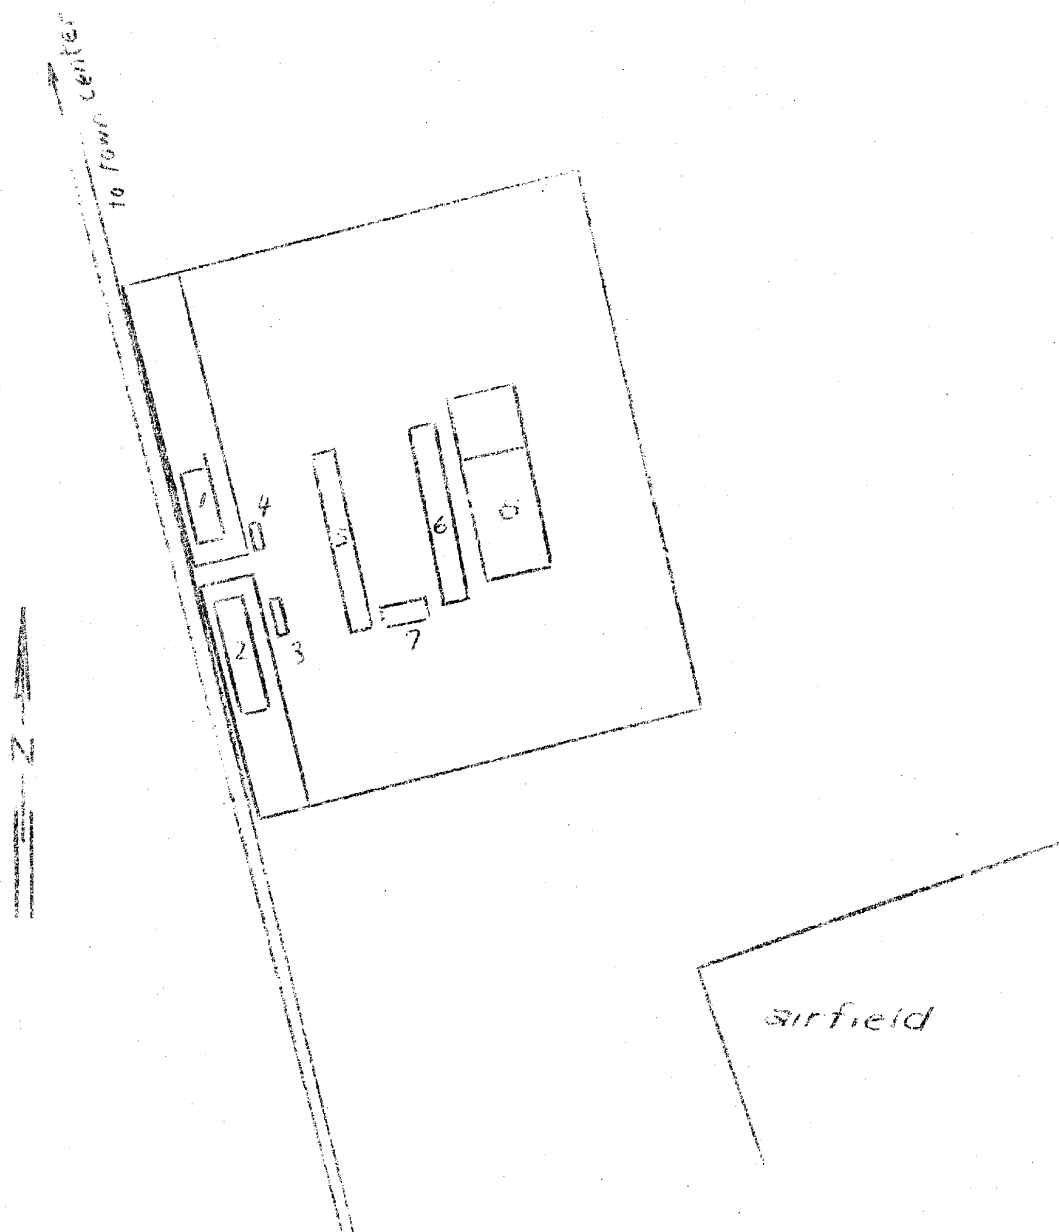

25X1A * [] Comment. For sketch of barracks installation assigned to the field, see Annex. A school for officer candidates is probably stationed there.
